- » Capybara
- » Git

- » Haml
- » React JS
- » Ruby on Rails
- » Sass/LESS

FREELANCE

WEB DESIGNER AND DEVELOPER (7/13 - PRESENT)

I design and develop bespoke websites and apps for small business-es and start ups with Rails, HTML, CSS and JavaScript.

EVERTRUE

FRONT END DEVELOPER COOP (1/14 - 6/14)

Independently developed, maintained and documented a Rails app that served dynamic landing pages using customer's branded assets and exposed assets to other apps via a JSON API.

Developed features and fixed bugs for the EverTrue Admin Console, a Backbone app used by universities and other non-profits, working with a team of two other front-end developers.

PAYPAL

RUBY ON RAILS DEVELOPER COOP (1/13 - 8/14)

Worked with a team of 6 developers to develop and maintain Cam-paign Manager, a Rails app used to traffick the PayPal Media Network.

Practiced test-driven development, pair programming and scrum with JIRA, Github and Rally.
